

Rethinking Sustainable Development: Urban Management, Engineering, and Design considers the role of urban, regional and infrastructure planning in achieving sustainable urban and infrastructure development, providing insights into overcoming the consequences of unsustainable development. This companion volume to Sustainable Urban and Regional Infrastructure: Technology, Planning and Management, overviews all aspects of sustainable urban and infrastructure development.

Table of Contents and List of Contributors

1. [Sustainable Urban Development: An Integrated Framework for Urban Planning and Development](#) (pages 1-14) **\$37.50**
 Suharto Teriman (Queensland University of Technology, Australia), Tan Yigitcanlar (Queensland University of Technology, Australia), Severine Mayere (Queensland University of Technology, Australia)
Sustainable development has long been promoted as the best answer to the world's environmental problems. This term has generated mass appeal as it implies that both...
[Sample PDF](#) | [More details...](#)
2. [Planning for Sustainable Urban Futures: An Ecological Approach to Sustainable Urban Development](#) (pages 15-25) **\$37.50**
 Didem Dizdaroglu (Queensland University of Technology, Australia), Tan Yigitcanlar (Queensland University of Technology, Australia), Les Dawes (Queensland University of Technology, Australia)
In recent years, cities have shown increasing signs of environmental problems due to the negative impacts of urban activities. The degradation and depletion of natur...
[Sample PDF](#) | [More details...](#)
3. [Sustainable Urban Stormwater Management: Water Sensitive Urban Dsign Perceptions, Drivers and Barriers](#) (pages 26-37) **\$37.50**
 Shinyi Lee (Queensland University Of Technology, Australia), Tan Yigitcanlar (Queensland University of Technology, Australia)
Stormwater has been recognised as one of the main culprits of aquatic ecosystem pollution and as a significant threat to the goal of ecological sustainable developme...
[Sample PDF](#) | [More details...](#)
4. [Integrated Sustainable Urban Infrastructure Management: The Brisbane Urban Growth Model](#) (pages 38-55) **\$37.50**
 Benson Au-Yeung (City Planning Branch, Brisbane City Council, Brisbane, Australia), Tan Yigitcanlar (Queensland University of Technology, Australia), Severine Mayere (Queensland University of Technology, Australia)
Sustainable urban development and the liveability of a city are increasingly important issues in the context of land use planning and infrastructure management. In r...
[Sample PDF](#) | [More details...](#)
5. [A Decision Support System for Sustainable Urban Development: The Integrated Land Use and Transportation Indexing Model](#) (pages 56-72) **\$37.50**
 Fatih Dur (Queensland University of Technology, Australia), Tan Yigitcanlar (Queensland University of Technology, Australia), Jonathan Bunker (Queensland University of Technology, Australia)
Broad, early definitions of sustainable development have caused confusion and hesitation among local authorities and planning professionals. This confusion has arise...
[Sample PDF](#) | [More details...](#)
6. [Information and Communication Technologies: Catalysts for Sustainable Urban Development](#) (pages 73-89) **\$37.50**
 Tan Yigitcanlar (Queensland University of Technology, Australia)
The concept of sustainable urban development has been pushed to the forefront of policy-making and politics as the world wakes up to the impacts of climate change an...
[Sample PDF](#) | [More details...](#)
7. [Planning Sustainable Communities: An Appropriate Basis for Sustainable Residential Communities?](#) (pages 90-103) **\$37.50**
 Paul Donehue (Queensland University of Technology, Australia)
This chapter evaluates the impact of commodification of land and housing on the sustainability of the residential built environment. Commodification, an institutiona...
[Sample PDF](#) | [More details...](#)
8. [Sustainable Transportation Development: A Framework to Determine Transportation Disadvantaged](#) (pages 104-118) **\$37.50**
 Kushairi Rashid (Queensland University of Technology, Australia), Tan Yigitcanlar

- (Queensland University of Technology, Australia), Jonathan Bunker (Queensland University of Technology, Australia)
- Urban sprawl combined with low density development causes unsustainable development patterns including accessibility and mobility problems, especially for those who... [Sample PDF](#) | [More details...](#)*
9. **User Characteristics of Transit Oriented Developments: The Case of Kelvin Grove Urban Village** (pages 119-133) **\$37.50**
 Deepti Muley (Queensland University of Technology, Australia), Jonathan Bunker (Queensland University of Technology, Australia), Luis Ferreira (Queensland University of Technology, Australia)
Transit oriented developments are high density mixed use developments located within short and easily walkable distance of a major transit centre. These developments... [Sample PDF](#) | [More details...](#)
 10. **Modelling Urban Public Transit Users' Route Choice Behaviour: A Review and Outlook** (pages 134-146) **\$37.50**
 Yulin Lee (Queensland University of Technology, Australia), Jonathan Bunker (Queensland University of Technology, Australia), Luis Ferreira (Queensland University of Technology, Australia)
Public transport is one of the key promoters of sustainable urban transport. To encourage and increase public transport patronage it is important to investigate the... [Sample PDF](#) | [More details...](#)
 11. **Traffic and Climate Change Impacts on Water Quality: Measuring Build-Up and Wash-Off of Heavy Metals and Petroleum Hydrocarbons** (pages 147-167) **\$37.50**
 Parvez Mahbub (Queensland University of Technology, Australia), Godwin Ayoko (Queensland University of Technology, Australia), Prasanna Egodawatta (Queensland University Of Technology, Australia), Tan Yigitcanlar (Queensland University of Technology, Australia), Ashantha Goonetilleke (Queensland University Of Technology, Australia)
Understanding the impacts of traffic and climate change on water quality helps decision makers to develop better policy and plans for dealing with unsustainable urba... [Sample PDF](#) | [More details...](#)
 12. **Urban Traffic Characteristics and Urban Stormwater Quality: A Methodology to Measure Traffic Generated Water Pollutants** (pages 168-185) **\$37.50**
 Janaka Gunawardena (Queensland University of Technology, Australia), Ashantha Goonetilleke (Queensland University Of Technology, Australia), Prasanna Egodawatta (Queensland University Of Technology, Australia), Godwin Ayoko (Queensland University of Technology, Australia), Jason Kerr (Queensland University of Technology, Australia)
Traffic generated pollutants are a significant threat to achieving sustainable urban and transport development goals. This chapter presents a comprehensive methodolo... [Sample PDF](#) | [More details...](#)
 13. **Infrastructure Sustainability: Damage Assessment in Multiple-Girder Composite Bridges Using Vibration Characteristics** (pages 186-201) **\$37.50**
 Hoi Wai Shih (Queensland University of Technology, Australia), David Thambiratnam (Queensland University of Technology, Australia), Tommy Chan (Queensland University of Technology, Australia)
Assessing the structural health state of urban infrastructure is crucial in terms of infrastructure sustainability. This chapter uses dynamic computer simulation tec... [Sample PDF](#) | [More details...](#)
 14. **Infrastructure Sustainability: Differential Axial Shortening of Concrete Structures** (pages 202-211) **\$37.50**
 Praveen Moragasipitiya (Queensland University of Technology, Australia), David Thambiratnam (Queensland University of Technology, Australia), Nimal Perera (Queensland University of Technology, Australia), Tommy Chan (Queensland University of Technology, Australia)
High density development has been seen as a contribution to sustainable development. However, a number of engineering issues play a crucial role in the sustainable c... [Sample PDF](#) | [More details...](#)
 15. **Infrastructure Sustainability: Vulnerability of Axially Loaded Columns Subjected to Transverse Impact Loads** (pages 212-229) **\$37.50**
 Herath Thilakarathna (Queensland University of Technology, Australia), David Thambiratnam (Queensland University of Technology, Australia), Manicka Dhanasekar (Queensland University of Technology, Australia), Nimal Perera (Queensland University of Technology, Australia)
Infrastructure engineering and sustainable design are among the important drivers of sustainable development. Increased industrialisation has brought to the forefron... [Sample](#)

- [PDF](#) | [More details...](#)
16. **Structural Health Monitoring: Vibration-Based Damage Detection and Condition Assessment of Bridges** (pages 230-243) **\$37.50**
 Liang Wang (Queensland University of Technology, Australia), Tommy Chan (Queensland University of Technology, Australia), David Thambiratnam (Queensland University of Technology, Australia), Andy Tan (Queensland University of Technology, Australia)
Structural health is a vital aspect of infrastructure sustainability. As a part of a vital infrastructure and transportation network, bridge structures must function... [Sample PDF](#) | [More details...](#)
 17. **Structural Health Monitoring of Bridges: Source Localisation in Acoustic Emission Technique** (pages 244-254) **\$37.50**
 Manindra Kaphle (Queensland University of Technology, Australia), Andy Tan (Queensland University of Technology, Australia), David Thambiratnam (Queensland University of Technology, Australia), Tommy Chan (Queensland University of Technology, Australia)
Managing the sustainability of urban infrastructure requires regular health monitoring of key infrastructure such as bridges. The process of structural health monito... [Sample PDF](#) | [More details...](#)
 18. **Sustainable Infrastructure Project Planning: Progress in Contemporary Decision Support Tools** (pages 255-270) **\$37.50**
 Omar Mohd Faizal (Queensland University of Technology, Australia), Bambang Trigunarsyah (Queensland University of Technology, Australia), Johnny Wong (Queensland University of Technology, Australia)
Most infrastructure project developments are complex in nature, particularly in the planning phase. During this stage, many vague alternatives are tabled - from the... [Sample PDF](#) | [More details...](#)
 19. **Project-Based Organisations: Overcoming Lack of Trust and Social Networks Within Small and Medium Project Teams** (pages 271-285) **\$37.50**
 Liang Chen (Queensland University of Technology, Australia), Anna Wiewiora (Queensland University of Technology, Australia), Bambang Trigunarsyah (Queensland University of Technology, Australia)
In sustainable development projects, as well as other types of projects, knowledge transfer is important for the organisations managing the project. Nevertheless, kn... [Sample PDF](#) | [More details...](#)
 20. **Sustainability Performance of Construction: Conceptual Models of Satisfaction Levels in Construction Projects** (pages 286-295) **\$37.50**
 Asrul Nasid Masrom (Queensland University of Technology, Australia), Martin Skitmore (Queensland University of Technology, Australia)
In general, the performance of construction projects, including their sustainability performance, does not meet optimal expectations. One aspect of this is the perfo... [Sample PDF](#) | [More details...](#)
 21. **Sustainable Infrastructure Assets: Capability for Infrastructure Capacity Management** (pages 296-305) **\$37.50**
 Eric Too (Queensland University of Technology, Australia), Martin Betts (Queensland University of Technology, Australia), Arun Kumar (Queensland University of Technology, Australia)
Building for a sustainable environment requires sustainable infrastructure assets. Infrastructure capacity management is the process of ensuring optimal provision of... [Sample PDF](#) | [More details...](#)
 22. **Knowledge Transfer in Project-Based Organisations: The Need for a Unique Approach** (pages 306-317) **\$37.50**
 Anna Wiewiora (Queensland University of Technology, Australia), Bambang Trigunarsyah (Queensland University of Technology, Australia), Glen Murphy (Queensland University of Technology, Australia)
Effective knowledge transfer between infrastructure projects plays a significant role in organisational success and discovery of new technologies, helping to achieve... [Sample PDF](#) | [More details...](#)
 23. **Afterword** (pages 318-319) **\$37.50**
The understanding that economic development, and in particular the development of the built environment, impacts on our natural environment has been well articulated... [Sample PDF](#) | [More details...](#)
